Co-founder and CTO of Otian AI, with a computer science degree and a public relations minor. I lead engineering on Archie, a desktop app that runs a personal AI agent on the user's machine, and build agents for Otian's back office and an artist's social media.

Experience

Co-Founder & Chief Technology Officer Otian AI — Apr 2026 – Present

- Co-founded the company after setting up AI agents by hand for clients, then turned that service into a product.
- Lead engineering on Archie, a desktop app for macOS and Windows that runs an AI agent on the user's own computer, now a public beta with a free tier, a Teams edition, and Archie Mobile on the App Store.
- Built the commercial layer: Stripe billing, Firebase auth with 2FA, a signed auto-updater, and an add-on marketplace.
- Built Hudson, an agent that runs Otian's back office (mail, calendars, leads, blog, social) and sends nothing without a founder's tap.
- Helped steer the company toward solo owners and small teams, working with them directly through Otian AI Consulting, and write the trust documentation that ties each privacy claim to code.

Software Engineer Intern MARA — Jun 2025 – Dec 2025

- Built a full-stack hashrate arbitrage tracker pulling four to six live exchange APIs into one dashboard for a ~60 EH/s mining fleet.
- Replaced manual cross-referencing between markets with one view of availability, pricing, and history for about 25 people.
- Shaped its scope with non-technical stakeholders, turning operational requirements into data they could read at a glance.

Assistant Accountant Weichert Realtors Equity — Aug 2021 – May 2022

- Built and maintained expense and income tracking across more than ten properties for a private real estate client.
- Served as the main internal contact on that account, and standardized its bookkeeping records and file organization.

Selected projects

Studioflow Independent, solo · React, TypeScript, Vite, Expo, React Native — 2026 to now

- Music collaboration app on the web and iPhone, built solo, with Sable, an agent that finds the moments in an artist's footage and writes each platform's captions, built to one written contract and 476 tests.

Nightlink App Store Independent, solo · React 19, Vite, Supabase, Capacitor, RevenueCat — 2025 to now

- Dream journal and social network on the App Store, with AI dream summaries, voice entry, and per-dream privacy on Supabase.

Tempify App Store Independent, solo · React, Vite, Tailwind CSS, Supabase, Stripe — 2026 to now

- Daily music game suite on the App Store (1.7), with Tempify Plus on Stripe and RevenueCat and puzzles made two weeks ahead.

Splitsy Coursework, team · React Native, Expo, Node.js, MongoDB, JWT — 2025

- Expense splitter with OCR receipts. In a ten-student study, a bill took 102 seconds by hand and 69 with Splitsy ($p = 0.017$).

Education

B.S. Computer Science, Minor in Public Relations University of Florida — Aug 2022 – May 2026

- 3.65 GPA. Senior project: Sideline, a mobile-first video app for youth soccer families, where I was frontend lead on a team of four.

Skills

Languages	TypeScript, JavaScript, Python, Rust, Swift, C++, C#
Frontend & Mobile	React, React Native, Expo, Capacitor, Vite, Tailwind CSS, App Store releases
Backend & Data	Node.js, Express, PostgreSQL, Prisma, Supabase, Firebase, MongoDB
Desktop & Systems	Tauri, Electron, .NET, Unity, Audio DSP
Cloud & Tooling	AWS S3, AWS Lambda, Vercel, Docker, Stripe, RevenueCat, GitHub Actions
AI	Agentic AI, OpenClaw, Claude Code, LLM Integration, Prompt Engineering
Beyond Code	Human-Computer Interaction, Public Relations, Live Commentary, Music Production, Video Production

Activities

Gator Esports at the University of Florida: Rocket League Caster; Rocket League Player (Aug 2024 - May 2026)

University of Florida Football: Green Team (Aug 2025)

Certifications

Microsoft Office Specialist (Word, PowerPoint, Excel) · Autodesk Certified User · Fundamentals of Media Relations · Hootsuite Platform
