

Jett Nguyen

Computer science graduate with a public relations minor. I co-founded Otian AI, where I am CTO and lead engineering on Archie, a desktop app that runs a personal AI agent on the user's own machine, and I build and run the agents behind Otian's back office and an artist's social media. I work across the stack and start from the person using it: what they expect, what they will actually do, and what they should never have to think about.

Experience

three roles

Co-Founder & Chief Technology Officer

Apr 2026 - Present

Otian AI

- Co-founded the company after setting up AI agents by hand for clients, then turned that service into a product.
- Lead engineering on Archie, a Rust, Tauri, and React desktop app for macOS and Windows, now a public beta with a Business edition and a phone app, that runs a personal agent on the user's own computer and answers from Telegram, Discord, Slack, Matrix, and iMessage.
- Built the commercial layer around it: Stripe billing, Firebase auth with 2FA, a signed auto-updater, and a marketplace of add-ons included with the app.
- Built Hudson, the agent that runs Otian's back office (three mailboxes, both calendars, leads, the blog, and company social), with every outgoing message waiting on a founder's tap.
- Own the client lifecycle from discovery call through configuration and fine-tuning, and write the public trust documentation that maps every privacy claim to shipped code.

Software Engineer Intern

Jun 2025 - Dec 2025

MARA

- Built a full-stack hashrate arbitrage tracker that pulled four to six live exchange APIs into one dashboard, supporting purchasing decisions across a ~60 EH/s mining fleet.
- Replaced manual cross-referencing between fragmented markets with a single view of availability, pricing trends, and transaction history for about 25 people in finance, operations, and strategy.
- Shaped the tool's scope by working with non-technical stakeholders and turning operational requirements into data they could read at a glance.

Assistant Accountant

Aug 2021 - May 2022

Weichert Realtors Equity

- Built and maintained expense and income tracking across more than ten properties for a private real estate client.
- Served as the main internal contact on that account, handling correspondence, documentation, and coordination.
- Kept bookkeeping records and standardized file organization for daily operations.

Education

B.S. Computer Science, Minor in Public Relations

University of Florida

Aug 2022 - May 2026

- 3.65 GPA across a dual focus in computer science and public relations.
- Senior project: Sideline, a mobile-first video app for youth soccer families.

Skills

Languages

TypeScript, JavaScript, Python, Rust, Swift, C++, C#

Frontend

React, Vite, Tailwind CSS, HTML / CSS

Mobile

React Native, Expo, Capacitor, App Store and TestFlight releases

Backend & Data

Node.js, Express, PostgreSQL, Prisma, Supabase, Firebase, MongoDB

Desktop & Systems

Tauri, Electron, .NET, Unity, Audio DSP

Cloud & Tooling

AWS S3, AWS Lambda, Vercel, Docker, Stripe, RevenueCat, GitHub Actions

AI

Agentic AI, OpenClaw, Claude Code, LLM Integration, Prompt Engineering

Beyond Code

Human-Computer Interaction, Public Relations, Live Commentary, Music Production, Video Production

Selected projects

all twenty

Archie

2026 to now

Independent, team · Rust, Tauri 2, React, TypeScript, Tailwind CSS

- Desktop app that runs a personal AI agent on your own machine, reachable from Telegram, Discord, Slack, Matrix, or iMessage on a Mac, and from its own phone app. Built at Otian AI on Tauri + Rust + React.
- Lead engineer through the 0.3.4 public beta. Rust and Tauri desktop app, and I own the client work end to end.

Hudson

2026 to now

Independent, team · OpenClaw, Claude, Python, Node.js, Firebase

- The agent that runs Otian AI's back office for Jack and me: three mailboxes, two calendars, leads and testers, the blog, and company social, with nothing leaving the company until one of us taps.
- Built and run it: about thirty routes and thirty scheduled jobs, with a capabilities page generated from its own code.

Studioflow

2026 to now

Independent, solo · React, TypeScript, Vite, Expo, React Native

- Music collaboration on the web and iPhone: songs, versions, files, and notes, plus a content side where SyWavy and I plan, caption, and track every post with Sable, the agent on my laptop.
- Solo build on the web and iPhone. Its agent, Sable, is built to one written contract, with 476 tests across phone, web, and API.

Nightlink

App Store

2025 to now

Independent, solo · React 19, Vite, Supabase, Capacitor, RevenueCat

- Dream journal and social network with AI-generated dream titles and summaries, voice entry, and per-dream privacy controls, on React and Supabase.
- Solo build, live on the App Store, with per-dream privacy controls and voice entry on Supabase.

Tempify

App Store

2026 to now

Independent, solo · React, Vite, Tailwind CSS, Supabase, Stripe

- Daily music game suite inspired by LinkedIn and NYT-style habits, combining multiple music trivia formats into one consistent daily experience.
- Solo build, live on the App Store at 1.7, with Tempify Plus on Stripe and RevenueCat and puzzles written two weeks ahead.

Splitsy

2025

Coursework, team · React Native, Expo, Node.js, MongoDB, JWT

- React Native expense-splitting app with OCR receipt scanning and group management. User testing showed ~33s task time reduction vs manual splitting.
- Measured against splitting the same bill by hand: ten students, both ways, in randomized order.

Activities

Gator Esports at the University of Florida

Gainesville, FL

Rocket League Caster

Current

Live commentary on the top team's matches

Rocket League Player

Aug 2024 - May 2026

Club roster, roughly the top 3% of ranked players

University of Florida Football
