ABOUT ME

A frontend-focused engineer with a background in computer science and public relations. I build with an emphasis on usability, accessibility, interaction, and how people think and behave when using technology.

EDUCATION

UNIVERSITY OF FLORIDA GAINESVILLE, FL AUG 2022 – MAY 2026
B.S. Computer Science | Minor in Public Relations

WORK EXPERIENCE

MARA HOLDINGS REMOTE JUN 2025 – DEC 2025
SOFTWARE ENGINEER INTERN

- Built internal tools used by data analysts and strategy teams, focusing on clarity, accuracy, and efficient workflows.
- Collaborated with non-engineers to translate operational needs to usable software features.
- Iterated on features based on team feedback to improve ease of use.

WEICHERT REALTORS EQUITY ST. PETE, FL AUG 2021 – MAY 2022
ASSISTANT ACCOUNTANT

- Developed and maintained property expense & income spreadsheets.
- Managed internal company relations with private clients.
- Bookkeeping assistance and organization of files for ease of use.

PROJECTS

TEMPIFY 2026 | Independent

- A music trivia **iOS game & web app** with five daily games and a premium subscription to unlock the archive, global leaderboard, and stats.
- Combined my love for game suites, music, and app development.

SIDELINE 2026 | UF

- A **mobile-first web app** for youth soccer video management and sharing.
- Tailored for soccer parents' needs when sharing what is most important.

STACKD 2026 | UF

- A **mobile/desktop web app** to create, store, study, and share flashcards.
- Makes use of sleek UI, minimal screen clutter, and AI-powered stack creation to help UF students in memorization-heavy courses study better.

NIGHTLINK 2025 | Independent

- A **web social media app** for dream sharing and AI dream analysis.
- Based on an identified market gap in online communities.

SPLITSY 2025 | UF

- A **mobile app** that helps track shared costs with others.
- Built upon the foundations of human-computer interaction to adhere to principles of design and work with human psychology.
