ABOUT ME

A frontend-focused engineer with a background in computer science and public relations. I build with an emphasis on usability, accessibility, interaction, and how people think and behave when using technology.

EDUCATION

UNIVERSITY OF FLORIDA *GAINESVILLE, FL* — *AUG 2022 – PRESENT*
B.S. Computer Science | Minor in Public Relations — *(MAY 2026 EXPECTED GRADUATION)*

WORK EXPERIENCE

MARA HOLDINGS *REMOTE* — *JUN 2025 – DEC 2025*
SOFTWARE ENGINEER INTERN

- Built internal tools used by data analysts and strategy teams, focusing on clarity, accuracy, and efficient workflows.
- Collaborated with non-engineers to translate operational needs to usable software features.
- Iterated on features based on team feedback to improve ease of use.

WEICHERT REALTORS EQUITY *ST. PETE, FL* — *AUG 2021 – MAY 2022*
ASSISTANT ACCOUNTANT

- Developed and maintained property expense & income spreadsheets.
- Managed internal company relations with private clients.
- Bookkeeping assistance and organization of files for ease of use.

PROJECTS

SPLITSY *2025*

- A mobile app that helps track shared costs with others.
- Built upon the foundations of human-computer interaction to adhere to principles of design and work with human psychology.

PULSE GEAR *2025*

- A 3D puzzle roleplay game developed in Unity.
- Accommodated first-time player needs via proper input handling, visual feedback, and engagement.

jett2fly.com *2025*

- A personal website showcasing my original music and videos.
- Designed to guide users through audio and visual content while reinforcing brand voice and tone.

GATOR FOUND *2024*

- A lost & found web app for UF students to report or retrieve lost items.
- Focused on reducing cognitive load and stress during the process of a time-sensitive situation.

THE GRIDIRON GURU *2023*

- A Football playmaker to suggest plays based on historical statistics.
- Translated raw NFL statistics into clear and actionable recommendations to make decision-making fast and accurate.
